Features and Benefits;

✓ Tulle Polyester Fabric;

Due to its structure of tulle polyester fabric, it does not adhere to the wound and allows easy exudate management.

✓ Silver Content;

Silver is an antimicrobial agent that has been used against viruses and bacteria for centuries. It acts against a wide range of viruses and bacteria in infected wounds and provides control of the infection. It is used to prevent infection in wounds at risk of infection.

✓ Controlled Silver Release;

It does not harm human tissue with controlled silver release. It is biocompatible.

✓ Silver Release up to 7 Days;

Silver release to the wound area continues for seven days in a controlled manner. Lunwell Wound Dressing with Silver does not need to be changed during this time. Thus, cost in wound care kept under control and minimized. In addition, long-term changes provide comfort to the patient.

✓ Flexible and Easy to Cut ;

The product is flexible and can be cut easily. In this way, it can be applied easily even in areas where use is difficult.

Lunwell Wound Dressing with Silver is available in 5x5cm, 10x10cm, 10x20cm, 15x15cm single and packs of 10, or it can be ordered in different sizes and quantities. Please contact for more information.
